

Unbridled Media Operating Platform

WHAT'S NEW — FEATURE WALKTHROUGH

[Project Finance](#) · [Production](#) · [Post](#) · [Team Management](#)

July 8, 2026 · 35 features

FEATURE 1 OF 35

Budget Tags — share visibility on a project

WHAT IT IS

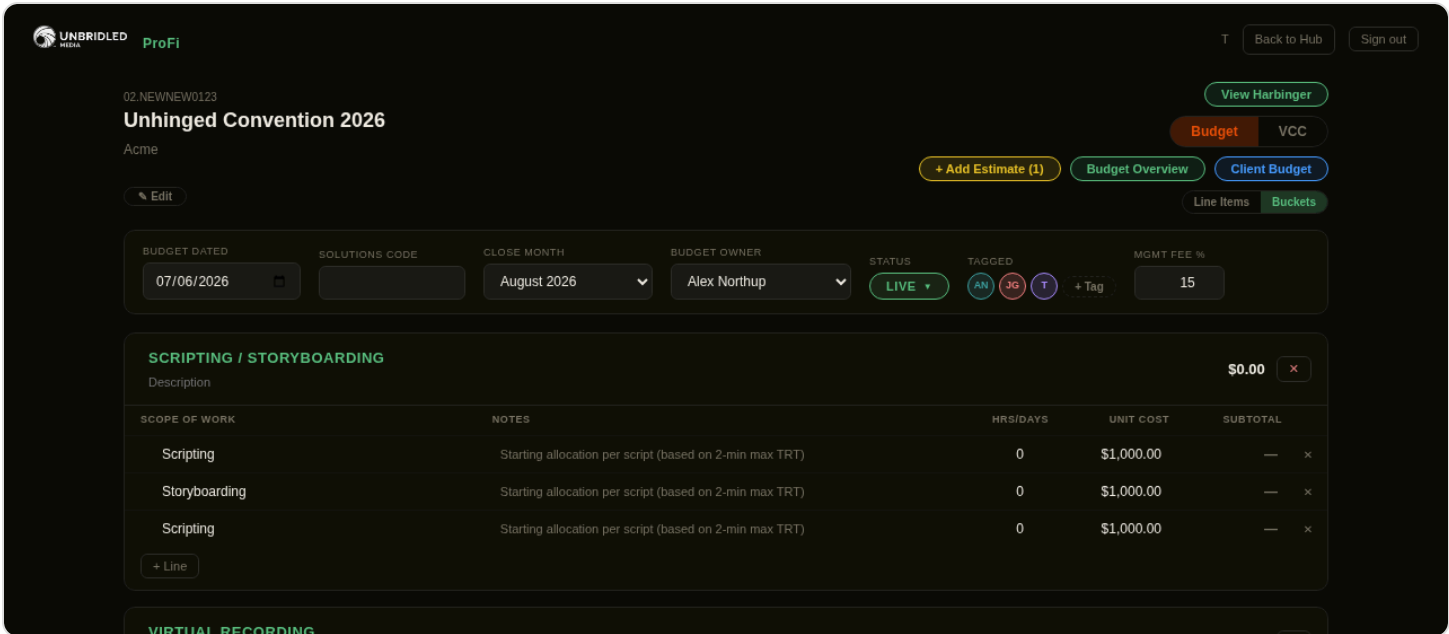

Tag teammates onto any project budget so it's clear who's working it. Each tagged person shows as a colored first/last-initial icon next to the budget's Status. Setting a Budget Owner automatically tags them, and tags drive the My Projects filter on the pipeline page.

WHERE TO ACCESS IT

ProFi → open any project budget → the header row next to Status (labeled "Tagged").

HOW TO USE IT

- 1. Open the project's budget in ProFi.
- 2. In the header row (Budget Dated / Owner / Status), find **Tagged** and click **+ Tag**.
- 3. Pick a name — the list matches the Budget Owner dropdown. Their initials icon appears instantly.
- 4. Setting the **Budget Owner** tags that person automatically — no extra step.
- 5. Click an initials icon to remove someone (it asks to confirm).

FEATURE 2 OF 35

Show My Projects filter on the Finance pipeline

WHAT IT IS

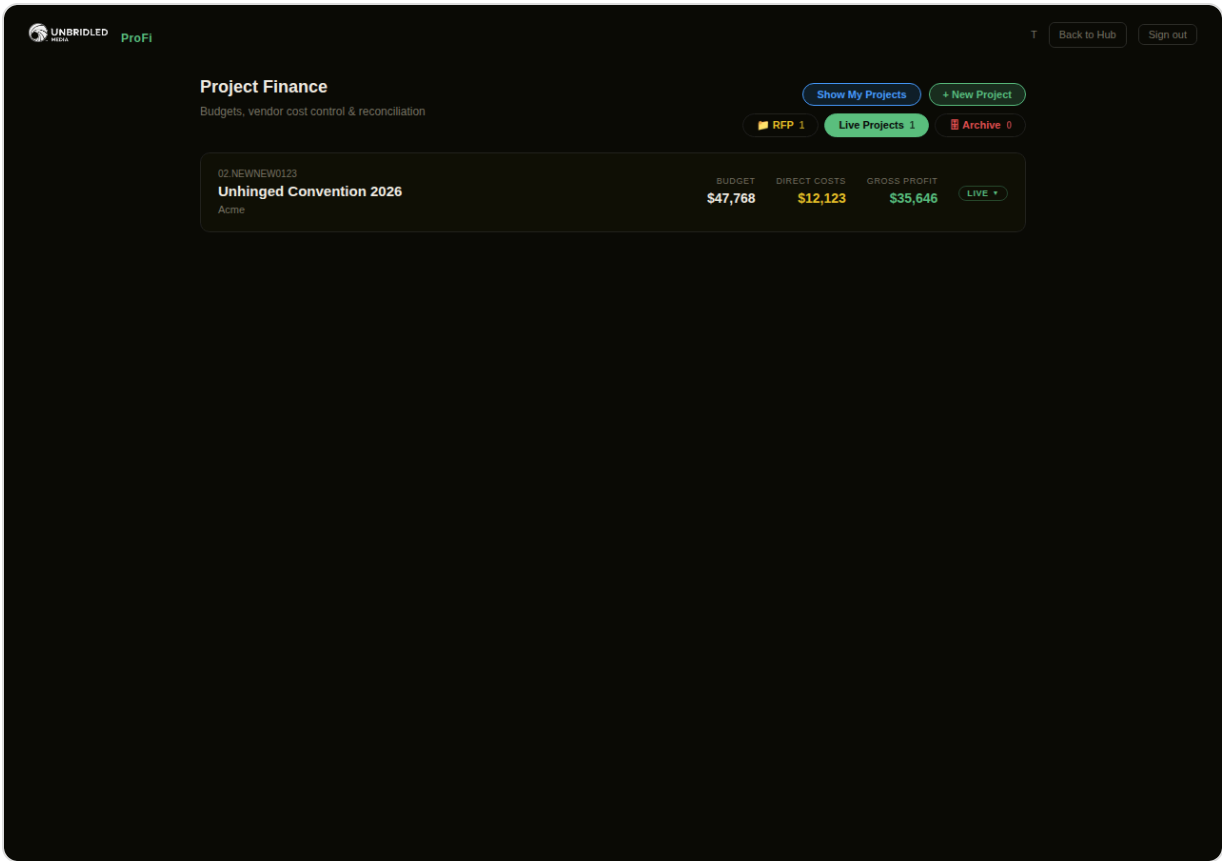

One click filters the Project Finance list down to only the budgets you own (Budget Owner) or are tagged on — no more scrolling everyone else's projects.

WHERE TO ACCESS IT

ProFi → Project Finance page → top right, next to + New Project.

HOW TO USE IT

- 1. Open Project Finance from the hub.
- 2. Click **Show My Projects** (top right) — the button turns blue "✓ My Projects" and the list filters to yours.
- 3. It works together with the RFP / Live / Archive folders.
- 4. Click it again to see everything.

FEATURE 3 OF 35

Hub: Project View / Operations View toggle

WHAT IT IS

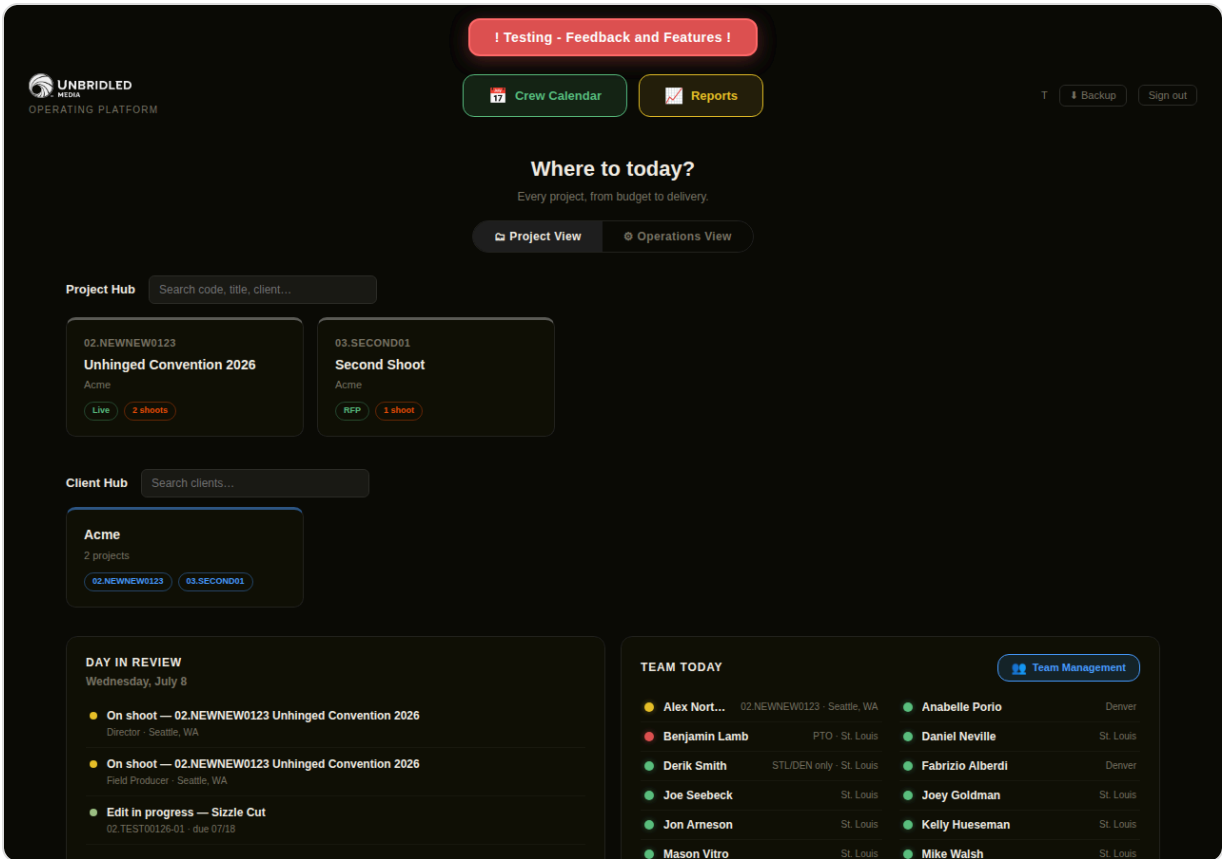

The hub now has two modes. Project View lists every project as a tile, organized by project code, with search. Operations View shows the three apps (ProFi, FreePro, AvocadoPost). Team Management stays as a full-width bar below both views. The hub remembers which view you used last.

WHERE TO ACCESS IT

The hub (home page) — the toggle sits centered under "Where to today?".

HOW TO USE IT

- 1. Sign in — the hub opens in the view you used last.
- 2. Click  **Project View** to browse all projects by code (use the search box for code, title, or client).
- 3. Click  **Operations View** to jump into ProFi, FreePro, or AvocadoPost directly.
- 4. **Team Management** is always available in the elongated blue tile below.

Project Workspace — Finance, Pre-Production & Post in one view

WHAT IT IS

Opening a project from Project View lands in a single workspace where you flip between the full ProFi budget, the FreePro production page, and the AvocadoPost project page. These are the real pages, not copies — any change made here (budget lines, schedules, edits) is instantly the same everywhere.

WHERE TO ACCESS IT

Hub → Project View → click any project tile.

HOW TO USE IT

- 1. From the hub's Project View, click a project tile.
- 2. Use the **Project Finance | Pre-Production | Post-Production** toggle at the top right to flip sections.
- 3. If a budget has multiple productions, a shoot-code dropdown appears on the Pre-Production tab.
- 4. The Post-Production tab creates the project's Avo page automatically the first time you open it.
- 5. < **All Projects** returns to the project list.

FEATURE 5 OF 35

Budget status paths (RFP → Live/Dead, Live → Reconcile/Closed)

WHAT IT IS

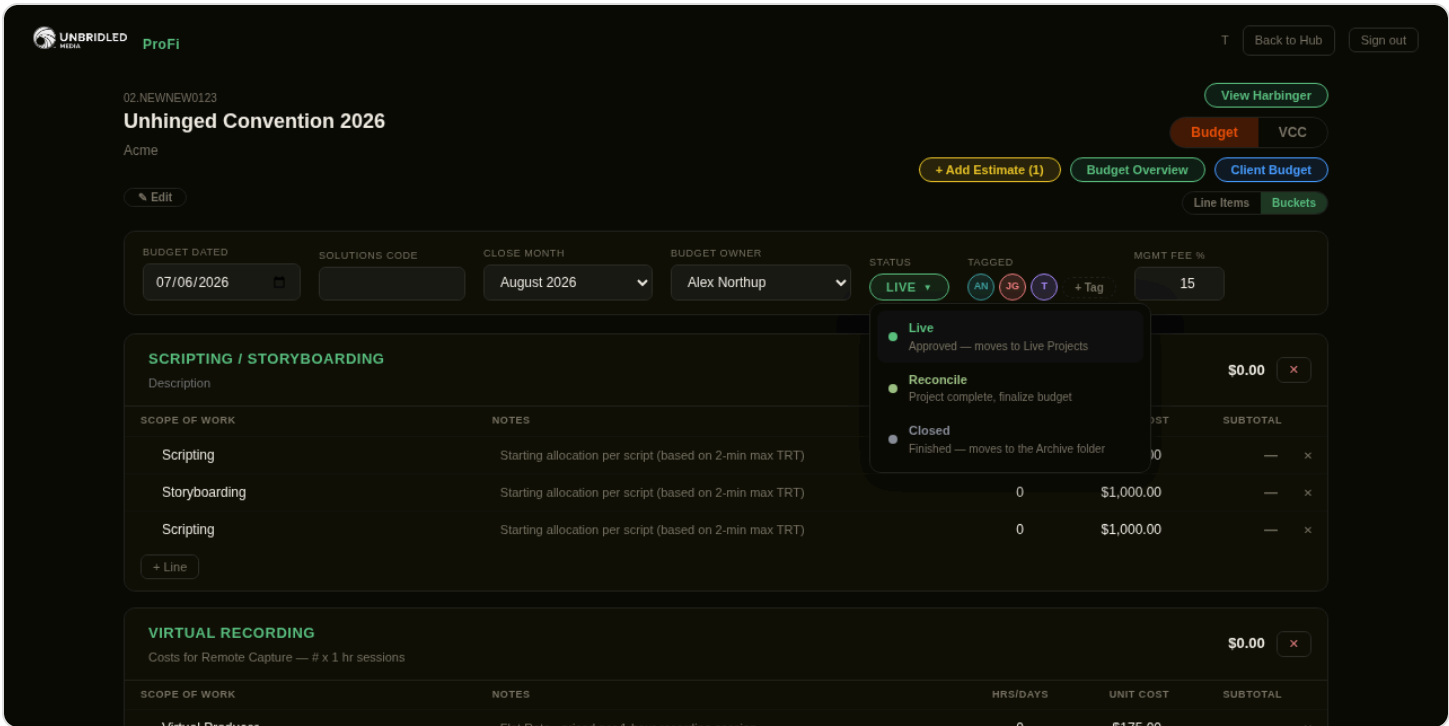

The budget status dropdown now guides the workflow instead of listing every status. From RFP you can go Live or Dead; from Live you can go Reconcile or Closed; Reconcile moves to Closed. Archived budgets can be reopened (Closed → Live, Dead → RFP).

WHERE TO ACCESS IT

ProFi → any project budget → the Status pill in the header row.

HOW TO USE IT

- 1. Open a budget and click the **Status** pill.
- 2. Only the valid next steps for the current status are offered (with a hint under each).
- 3. **Dead** and **Closed** both send the budget to the Archive folder; closing also archives its FreePro shoot tiles.

FEATURE 6 OF 35

Archive organized by Closed / Dead and by year

WHAT IT IS

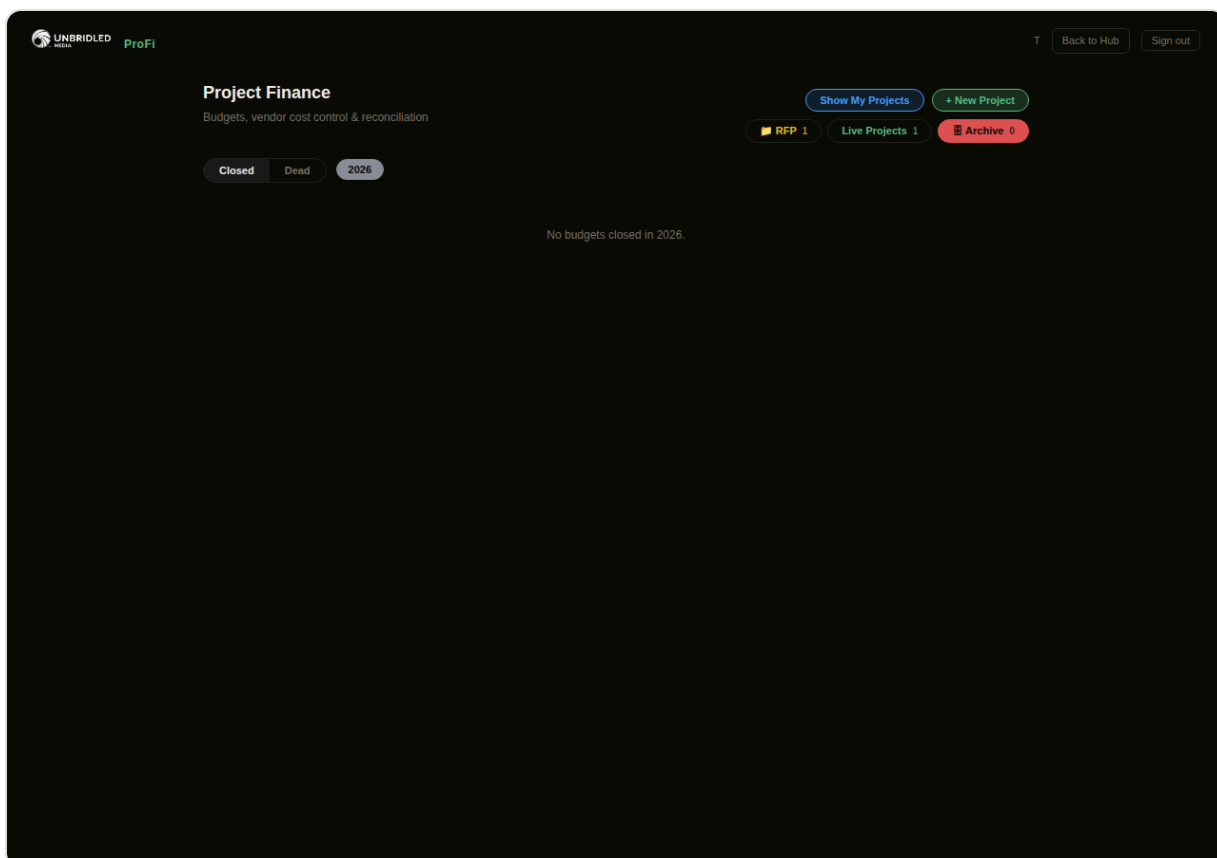

The Archive folder separates finished work from dead RFPs, and closed budgets are filed by year so the archive stays browsable as it grows.

WHERE TO ACCESS IT

ProFi → Project Finance → the Archive folder chip.

HOW TO USE IT

1. Open the **Archive** folder on the Project Finance page.
2. Use the **Closed | Dead** toggle — Closed is the default.
3. In Closed, pick a year from the scrollable chips (defaults to the current year; the year comes from the budget's close month).
4. Dead shows all not-approved budgets in one list.

FEATURE 7 OF 35

Hub dashboard — Day in Review & Team Today

WHAT IT IS

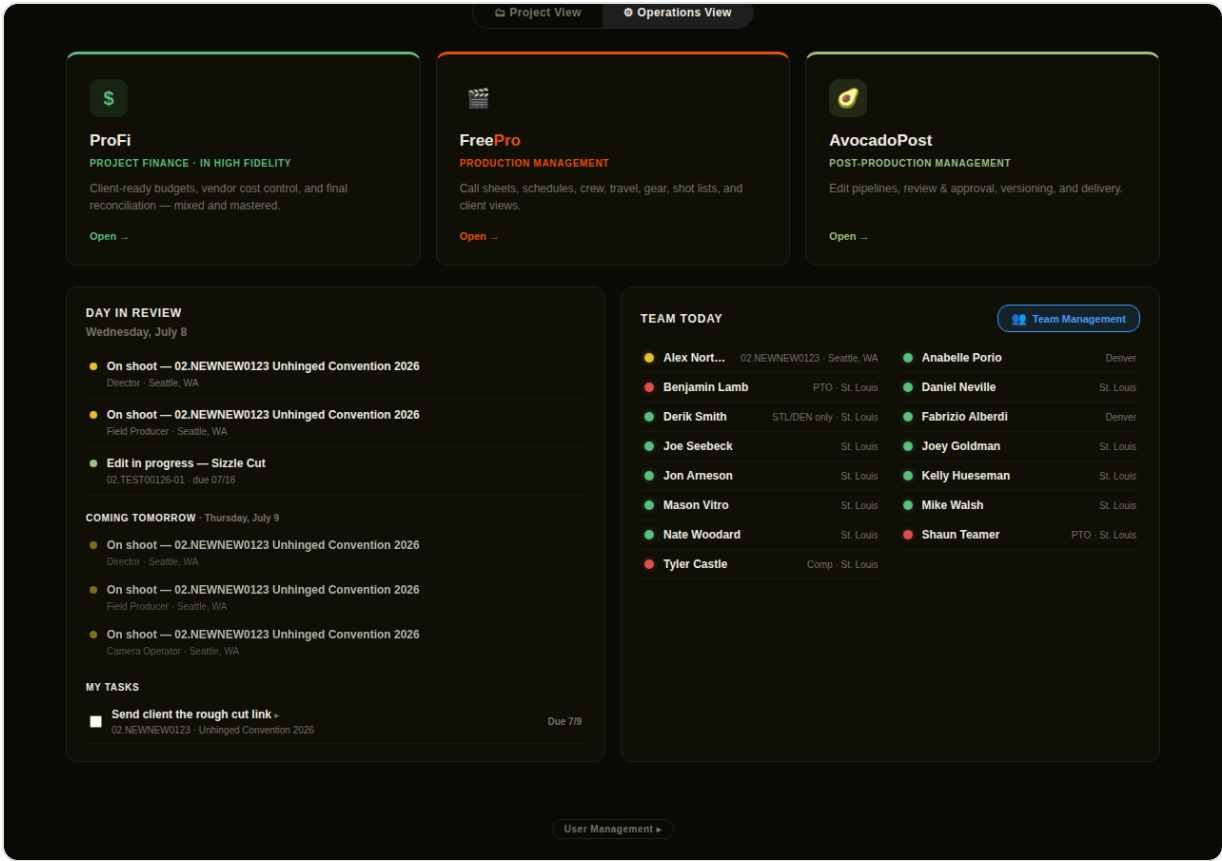

The lower half of the hub is now a live dashboard. The left panel is your personal Day in Review: shoots you're on today and anything due today on edits where you're the editor, PM, or task assignee. The right panel shows where every Unbridled team member is right now with a status bubble — red for Out of Office/PTO, yellow for traveling/on a shoot (with the shoot's city as their location), green for in office (St. Louis, or Denver for our Denver folks).

WHERE TO ACCESS IT

The hub (home page), below the tiles — visible in both Project View and Operations View.

HOW TO USE IT

- 1. Sign in — **Day in Review** builds itself from your assignments for today; click any row to jump to that shoot or edit.
- 2. You'll see items when you're on a shoot, when an edit or timeline milestone you own is due, when an edit window starts, or when you're on PTO.
- 3. **Team Today** lists the team with status bubbles: ● PTO/OOO, ● traveling/on a shoot (location = shoot city), ● in office.
- 4. The **Team Management** button sits at the top right of the Team Today panel.

FEATURE 8 OF 35

Reports section (Project Finance Overview moved here)

WHAT IT IS

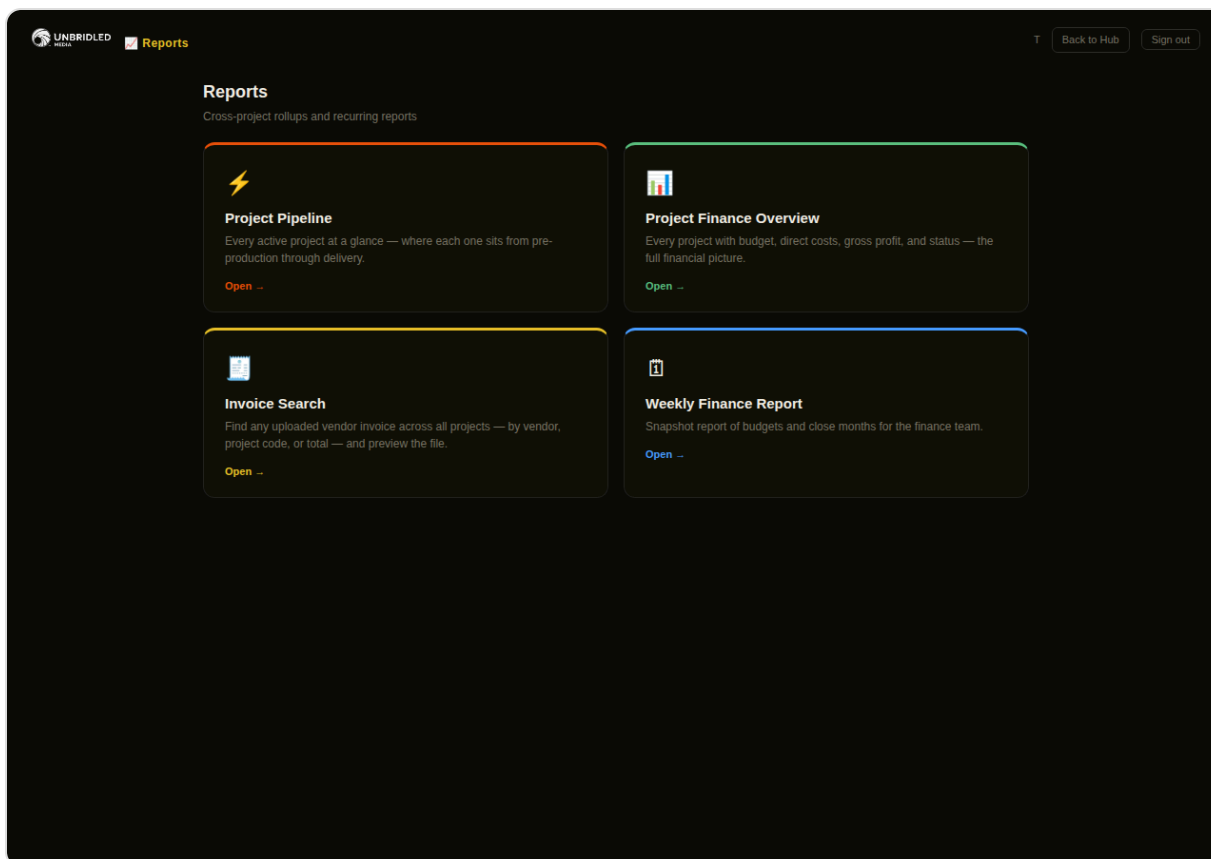

A new Reports area on the hub collects cross-project rollups. Project Finance Overview has moved out of ProFi into Reports, alongside the Weekly Finance Report.

WHERE TO ACCESS IT

Hub → the  Reports button at the top, next to Crew Calendar.

HOW TO USE IT

1. Click  **Reports** on the hub.
2. Pick a report card — **Project Finance Overview** (budgets, direct costs, gross profit per project) or **Weekly Finance Report**.
3. The overview is no longer on the ProFi page — this is its new home.

Vendor Invoices on the VCC (with AI reading)

WHAT IT IS

Each project's VCC now has a Vendor Invoices library: upload the actual invoice files and they live with the project. When an invoice PDF or photo is uploaded, AI reads it and fills in the vendor name and invoice total automatically. The redundant Sync FreePro Costs button was removed (costs auto-sync).

WHERE TO ACCESS IT

ProFi → project budget → VCC tab → the  Vendor Invoices button on the right of the toolbar.

HOW TO USE IT

- 1. Open a project's VCC and click  **Vendor Invoices**.
- 2. Click **+ Upload Invoice** and pick the file (PDF, photo, or spreadsheet — 20MB max).
- 3. For PDFs and photos, the vendor name and total appear on the row automatically after upload.
- 4. Click a filename (or ↓) to download; × deletes with a confirm.

Printer-friendly PDFs (shot lists & call sheets)

WHAT IT IS

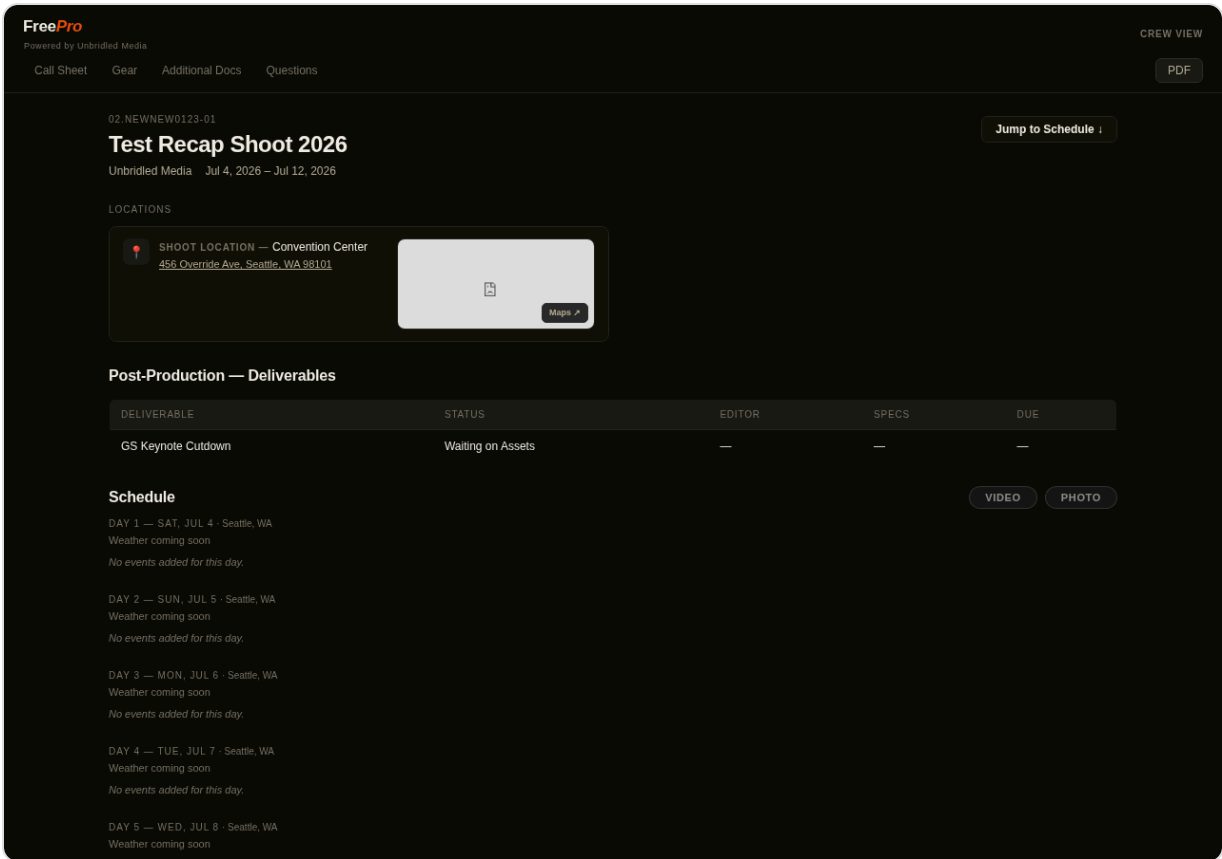

Exporting a shot list or call sheet now produces a clean, high-contrast report instead of a screen print: white pages, black text, no browser URL/title stamped at the top and bottom, interactive buttons removed, and rows kept together across page breaks.

WHERE TO ACCESS IT

Any shared view (shot list, call sheet) → the PDF button in the top bar, or your browser's Print.

HOW TO USE IT

- 1. Open the shot list (or call sheet) view and click **PDF**.
- 2. In the print dialog choose **Save as PDF** — margins and styling are handled for you.
- 3. The printed document is titled with the project code and name.
- 4. Scene color-coding (INT blue / EXT green) is kept for navigation; all text prints black.

Invoice Search report

WHAT IT IS

A cross-project invoice finder in Reports. Search every uploaded vendor invoice by vendor name, project code, or exact invoice total, and click any result to preview the actual file in a pop-out viewer (PDFs and photos render inline).

WHERE TO ACCESS IT

Hub →  Reports → Invoice Search.

HOW TO USE IT

- 1. Open **Reports** from the hub and click **Invoice Search**.
- 2. Type in any of the three filters — **Vendor** (matches the AI-read vendor name or the filename), **Project Code**, or **Invoice Total** (exact amount). Results update as you type.
- 3. Click a row to pop out a quick view of the invoice file; use **Download** to save it.
- 4. Invoices get here automatically — anything uploaded on a project's VCC → Vendor Invoices is searchable.

 **Reports**

Click any invoice to preview the file. Vendor and total are read automatically when invoices are uploaded on a project's VCC.

Budget Overview (renamed, counts crew correctly)

WHAT IT IS

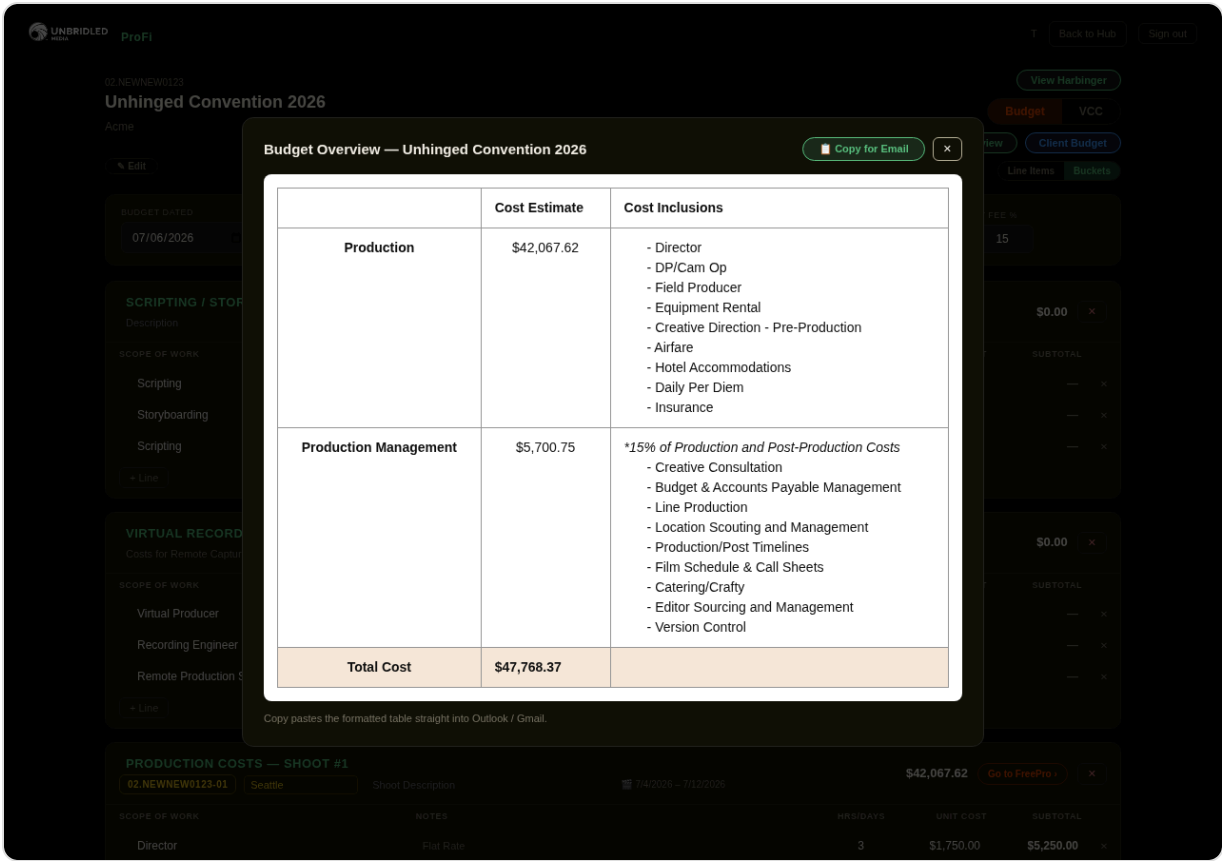

The client-facing summary on each budget is now called Budget Overview (it stays "Estimate Overview" on estimates). Cost Inclusions now count crew members — one line item equals one person, shown as "2x Director" style when a role repeats — instead of counting billable days. On budgets in Estimate mode, the overview pulls live from the estimate you're viewing, including unsaved edits.

WHERE TO ACCESS IT

ProFi → project budget → the Budget Overview button (top of the budget); in Estimate mode, the Estimate Overview button.

HOW TO USE IT

- 1. Open a budget and click **Budget Overview**.
- 2. Each section lists its estimate total and the crew/services included — headcount, not days.
- 3.  **Copy for Email** pastes the formatted table straight into Outlook or Gmail.
- 4. In Estimate mode, the same button reads **Estimate Overview** and reflects the estimate exactly as it's currently shown.

Project Hub & Client Hub on Project View

WHAT IT IS

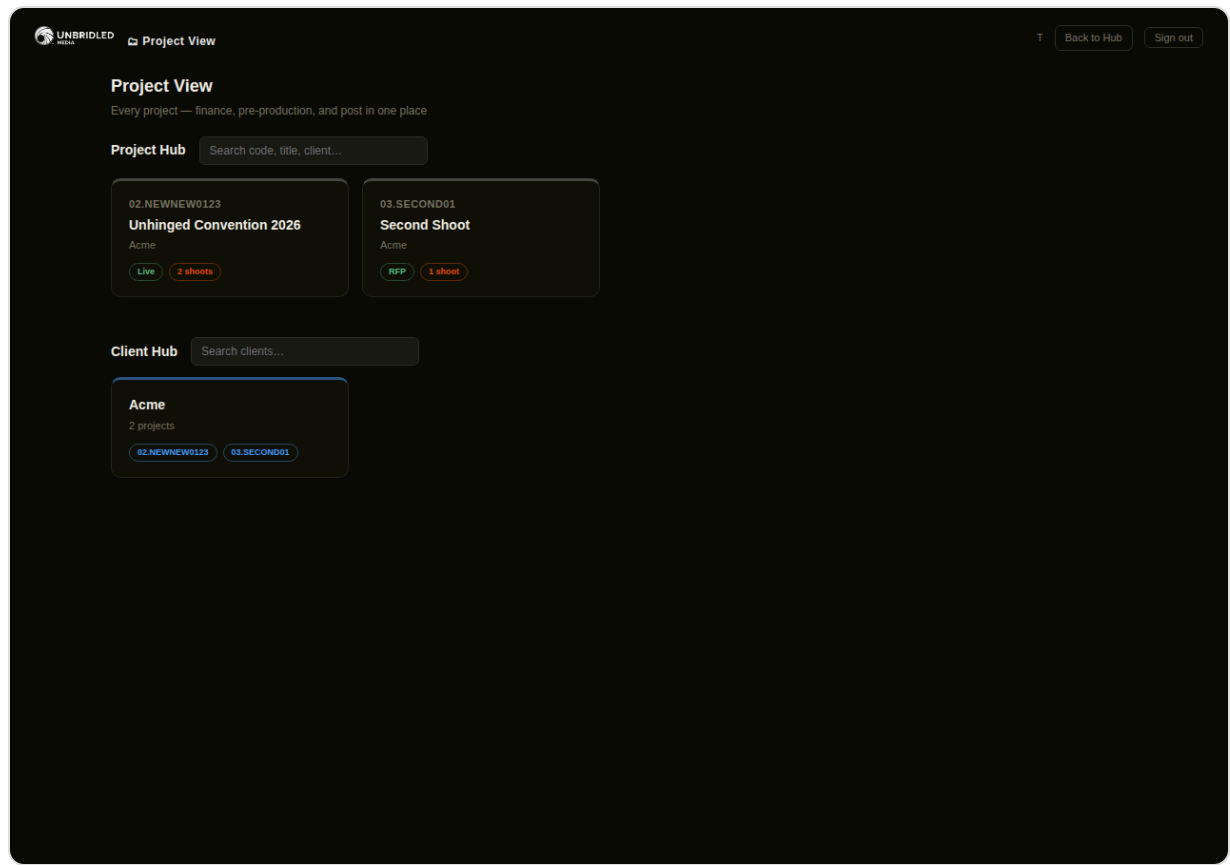

Project View is now split into two sections, each with its own search bar. Project Hub lists every project as a tile. Client Hub gives every client a mini-hub: all of their projects in one place plus a Client Resources library for logos, brand guidelines, and other shared files. Each client hub also has a Client View toggle — the future client portal (coming soon) — which marks the page with an orange border so it's obvious you're looking at what the client will see.

WHERE TO ACCESS IT

Hub → Project View toggle (or the standalone Project View page). Client tiles sit below the project tiles.

HOW TO USE IT

1. Switch the hub to **Project View** — **Project Hub** is at the top with its search bar beside it.
2. Scroll to **Client Hub** and use its own search bar to find a client, then click their tile.
3. Inside the mini-hub, click any project tile to open its full workspace, or use **Client Resources** to upload the client's logo and brand guidelines (logos show as thumbnails; everything is downloadable).
4. Flip the **Team View | Client View** toggle to preview the client portal — the orange top border means you're in client-access view.

FEATURE 14 OF 35

Client roster with duplicate detection

WHAT IT IS

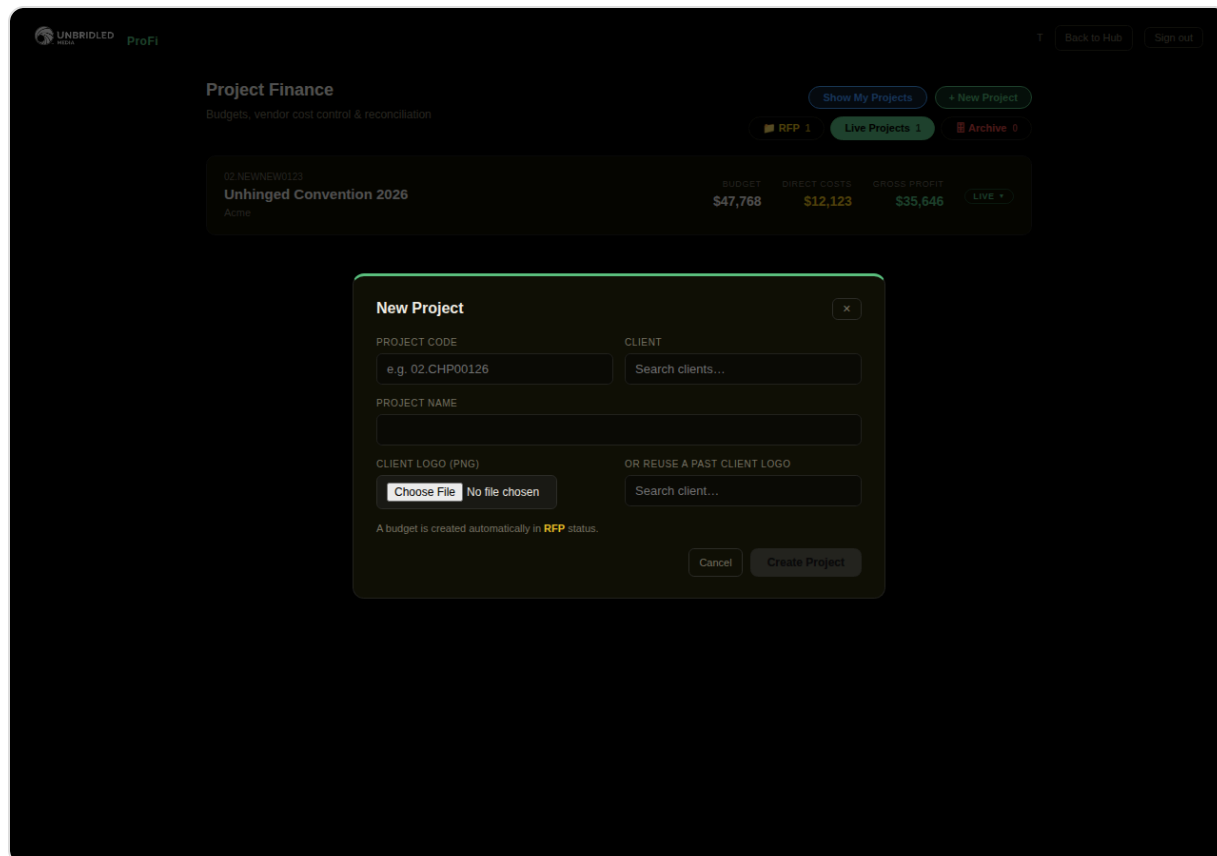

The Client field on budgets is now a searchable dropdown backed by a company-wide client roster, so every project uses the exact same client spelling (which keeps Client Hubs from splitting). New names can be added on the spot — and if a new name looks too much like an existing client (typo, abbreviation, alternate spelling), AI flags it as a possible duplicate before it's added, with a one-click override if it really is a different client.

WHERE TO ACCESS IT

ProFi → + New Project, or any budget →  Edit → the Client field.

HOW TO USE IT

1. Start typing in the **Client** field — matching roster clients appear; click one to select it.
2. If the client isn't listed, click **+ Add “...” as a new client**.
3. If the name resembles an existing client, a **⚠ Possible duplicate** panel appears: click **Use “...”** to pick the existing client, or **It's a different client — add anyway** to override.
4. The roster started pre-loaded with every client name already on your projects.

FEATURE 15 OF 35

Client Hub password

WHAT IT IS

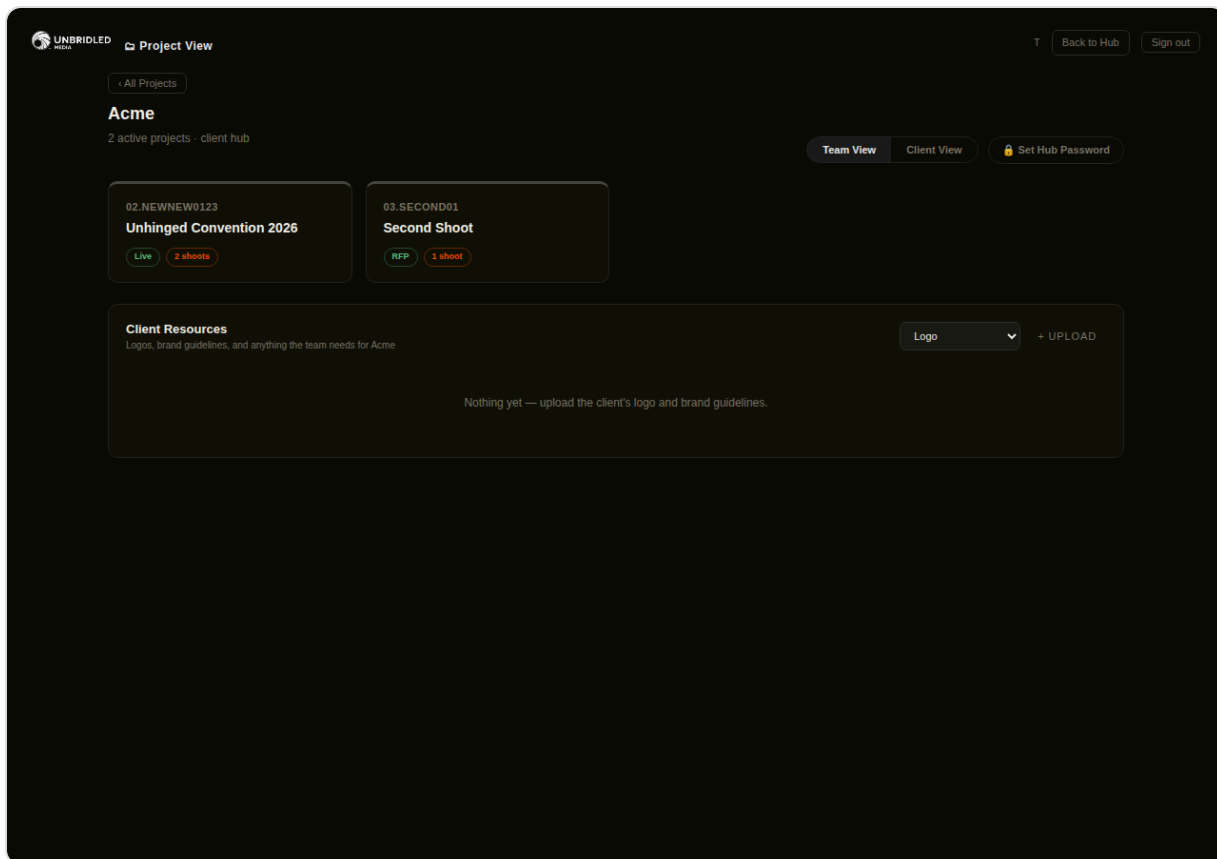

Each client hub now has its own password, set from a button right of the Team View / Client View toggle. This is the password clients will use to open their portal once the Client View ships — set it now and it's ready when the portal is.

WHERE TO ACCESS IT

Project View → any client's hub → the  button next to the view toggle.

HOW TO USE IT

1. Open a client's hub and look right of the **Team View | Client View** toggle.
2. Click  **Set Hub Password** and type the password — the button turns green ( **Password Set**).
3. Click it again to change the password, or leave the prompt empty to remove it.

Drive field on the edit form

WHAT IT IS

Each AvocadoPost edit now records which drive its media lives on, right next to Category on the edit form. Changes are tracked in the edit's activity feed like every other field.

WHERE TO ACCESS IT

AvocadoPost → open any edit → the Drive field beside Category.

HOW TO USE IT

1. Open an edit from the pipeline.
2. Type the drive name or number in **Drive** (next to Category) — it saves automatically when you click away.

Customizable grids on Avo project pages

WHAT IT IS

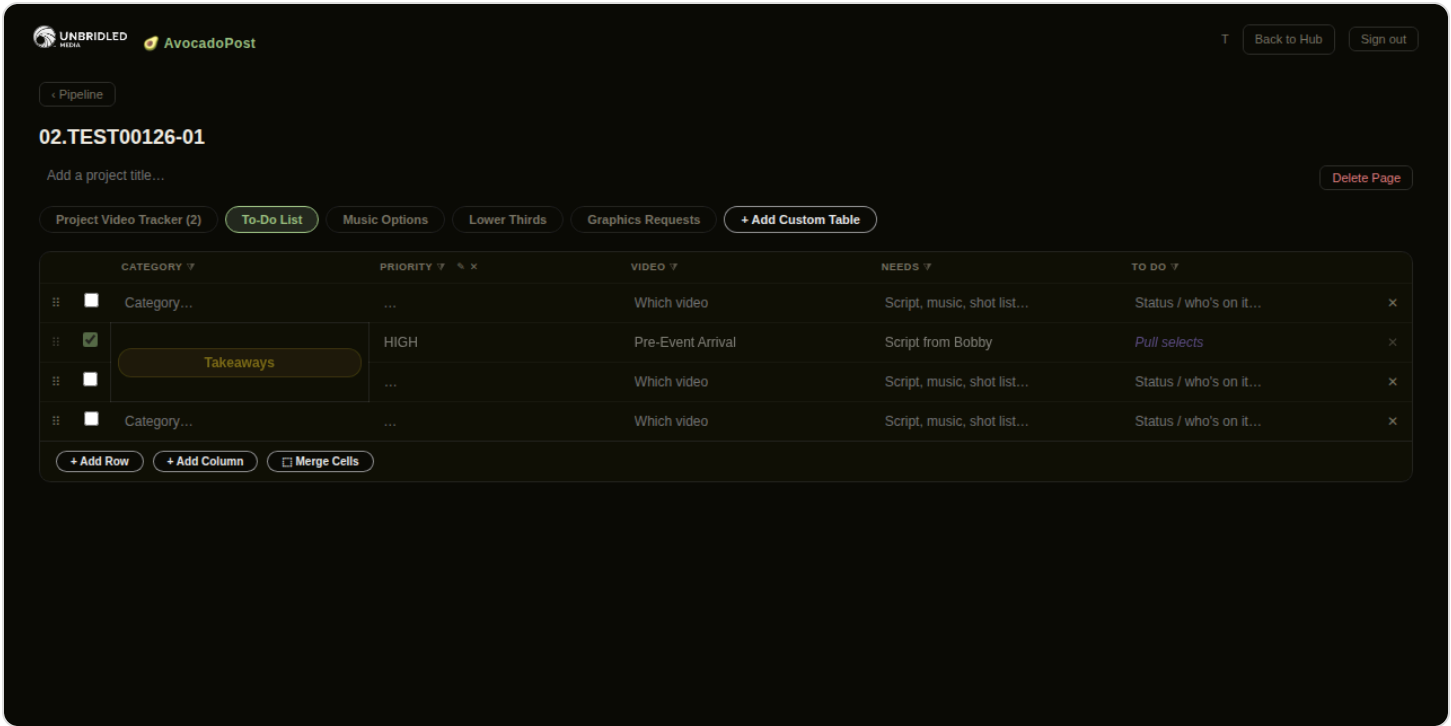

Every tab on an Avo project page (Video Tracker, To-Do List, Music Options, Lower Thirds) is now a customizable grid: add your own text columns, merge cells into blocks, drag rows and columns into any order, and add rows from every tab — including the Video Tracker, where a new row creates a real pipeline edit. Layouts are saved per project.

WHERE TO ACCESS IT

AvocadoPost → Project Lookup → open a project → any tab. The toolbar sits under each grid.

HOW TO USE IT

- 1. **+ Add Row** — on the Video Tracker it asks for a title and creates a pipeline edit under this project's code.
- 2. **+ Add Column** — name it and a text column appears; hover its header for  rename /  remove.
- 3. **Merge Cells** — click the button, click the first and last cell of the block (any rectangle), then  **Apply Merge**. Click a merged cell in merge mode to Unmerge.
- 4. Drag the  grip to reorder rows; drag a column header onto another to reorder columns.
- 5. Everything (columns, merges, order) is remembered per project page.

FEATURE 18 OF 35

Custom tables on Avo project pages

WHAT IT IS

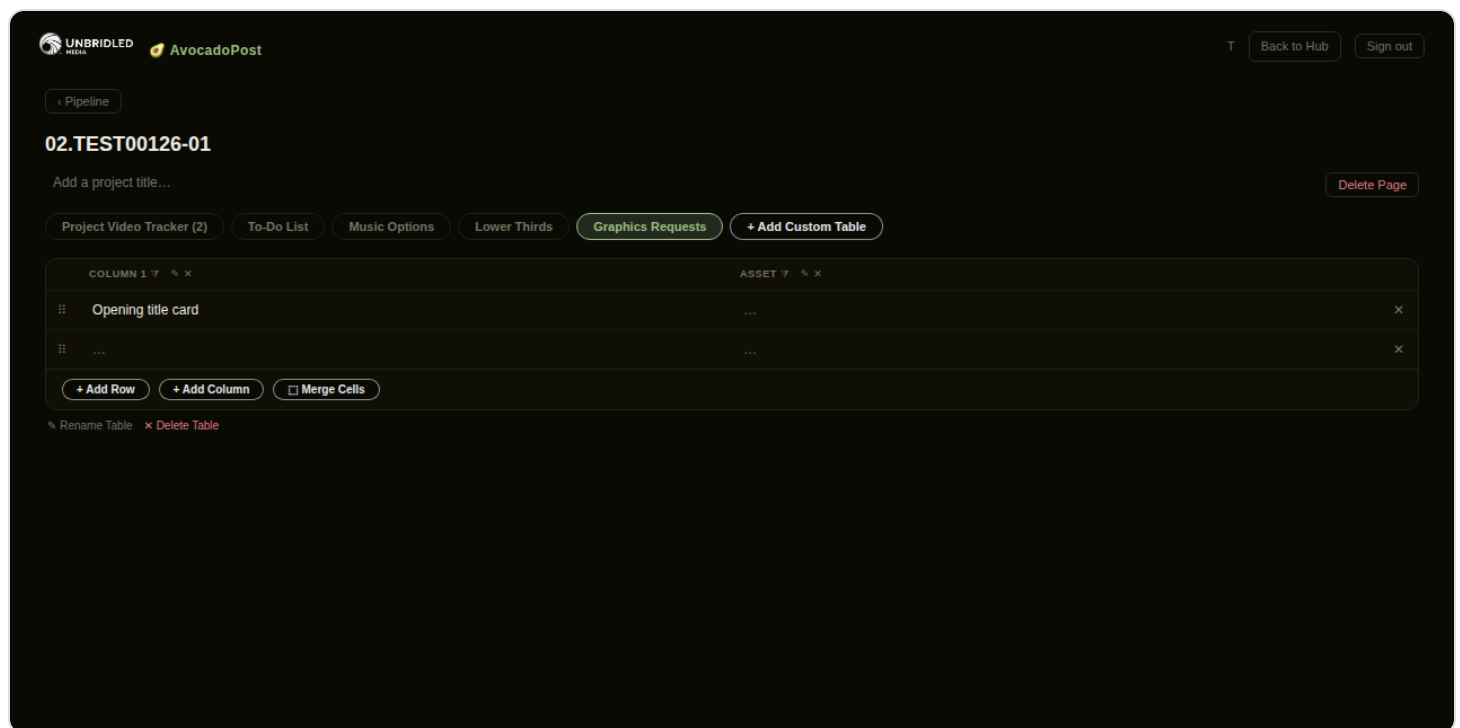

Build your own tables on any Avo project page. + Add Custom Table creates a new tab next to the built-in four, starting with one column — from there it has the full grid toolkit: add rows and columns, merge cells, drag to reorder, and per-column filters. Each project keeps its own set of tables.

WHERE TO ACCESS IT

AvocadoPost → open a project page → + Add Custom Table at the end of the tab row.

HOW TO USE IT

1. Click **+ Add Custom Table** and name it (e.g. "Graphics Requests") — it opens as a new tab.
2. Use **+ Add Row** / **+ Add Column** to build it out; every cell is editable text.
3. Merge, drag-reorder, and filter work exactly like the built-in tabs.
4. 🖱️ **Rename Table** and ✕ **Delete Table** sit under the grid.

Column filters on every Avo grid

WHAT IT IS

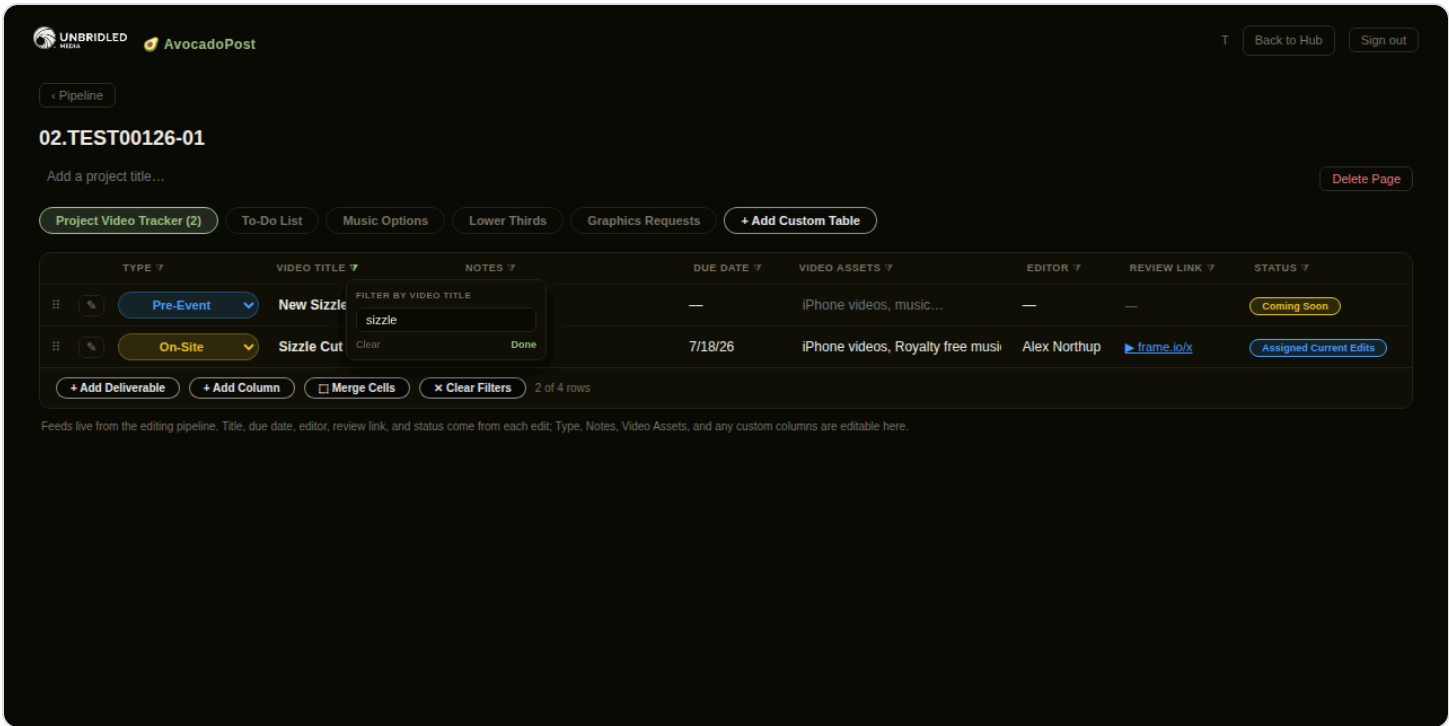

Every column header on every Avo grid — built-in tabs and custom tables — has a small ▼ filter icon. Click it for a dropdown that narrows rows to matches as you type. Filter several columns at once; active filters tint their icon green and the toolbar shows the match count with a one-click reset.

WHERE TO ACCESS IT

Any Avo project page tab → the ▼ icon beside each column name.

HOW TO USE IT

- 1. Click the ▼ icon on a column and type in the **Contains...** box — rows filter live.
- 2. **Enter** or **Done** closes the dropdown; **Clear** resets that column.
- 3. Stack filters on multiple columns; the toolbar shows "N of M rows" and **✕ Clear Filters** resets everything.
- 4. Row dragging and merging pause while a filter is hiding rows, and come right back when cleared.

Project Overview — cover page with call notes & to-dos

WHAT IT IS

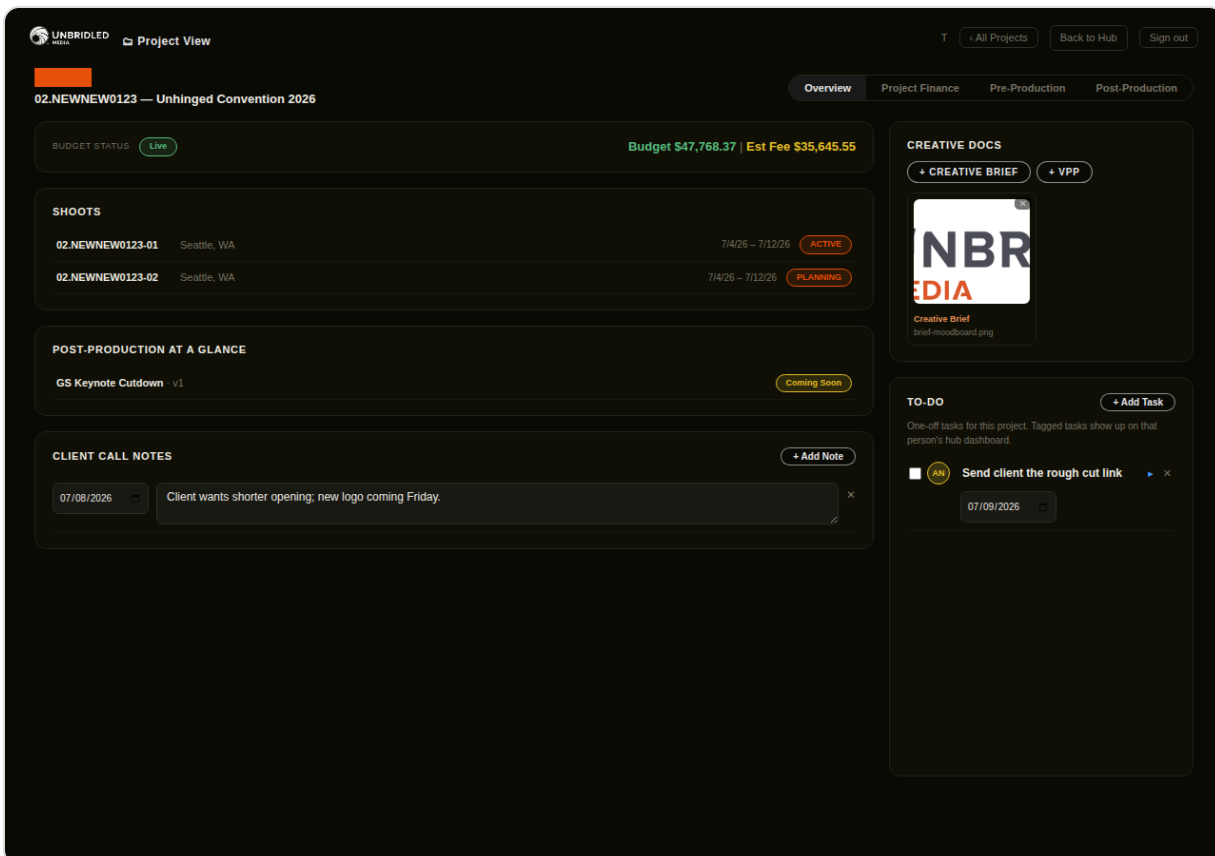

Every project in Project View now opens on an Overview tab: a cover page showing the budget status, each shoot with dates and status, post-production at a glance (every edit with its pipeline status), and a Client Call Notes section for dated takeaways from client calls. On the right is a project To-Do list for one-off tasks — checkbox, task, a tag for any Unbridled crew member, and a complete-by date, with a click-to-expand description on each task.

WHERE TO ACCESS IT

Hub → Project View → any project (Overview is the first tab and the default).

HOW TO USE IT

1. Open a project — the Overview loads first. Click any shoot or edit row to jump to its full page.
2. **+ Add Note** under Client Call Notes creates a dated entry; the date and text edit inline.
3. **+ Add Task** on the To-Do column adds a task: type it, pick a crew member in the **Tag** dropdown, set the **complete-by date** (red when overdue), and click ► to add a description.
4. Check the box when it's done — completed tasks strike through and drop to the bottom.

FEATURE 21 OF 35

My Tasks on the hub dashboard

WHAT IT IS

Tasks tagged to you on any Project Overview follow you home: the Day in Review panel on the hub now has a My Tasks section listing your open tasks with a checkbox, the task and its project, and the due date (red when overdue). Checking the box completes the task everywhere.

WHERE TO ACCESS IT

The hub (home page) → Day in Review panel, below today's items.

HOW TO USE IT

- 1. Sign in — any open task tagged to you appears under **My Tasks**.
- 2. Due dates show on the right; overdue dates are red.
- 3. Click the checkbox to mark it complete — it clears from your list and checks off on the project's Overview too.

User Management

Edit / override location addresses

WHAT IT IS

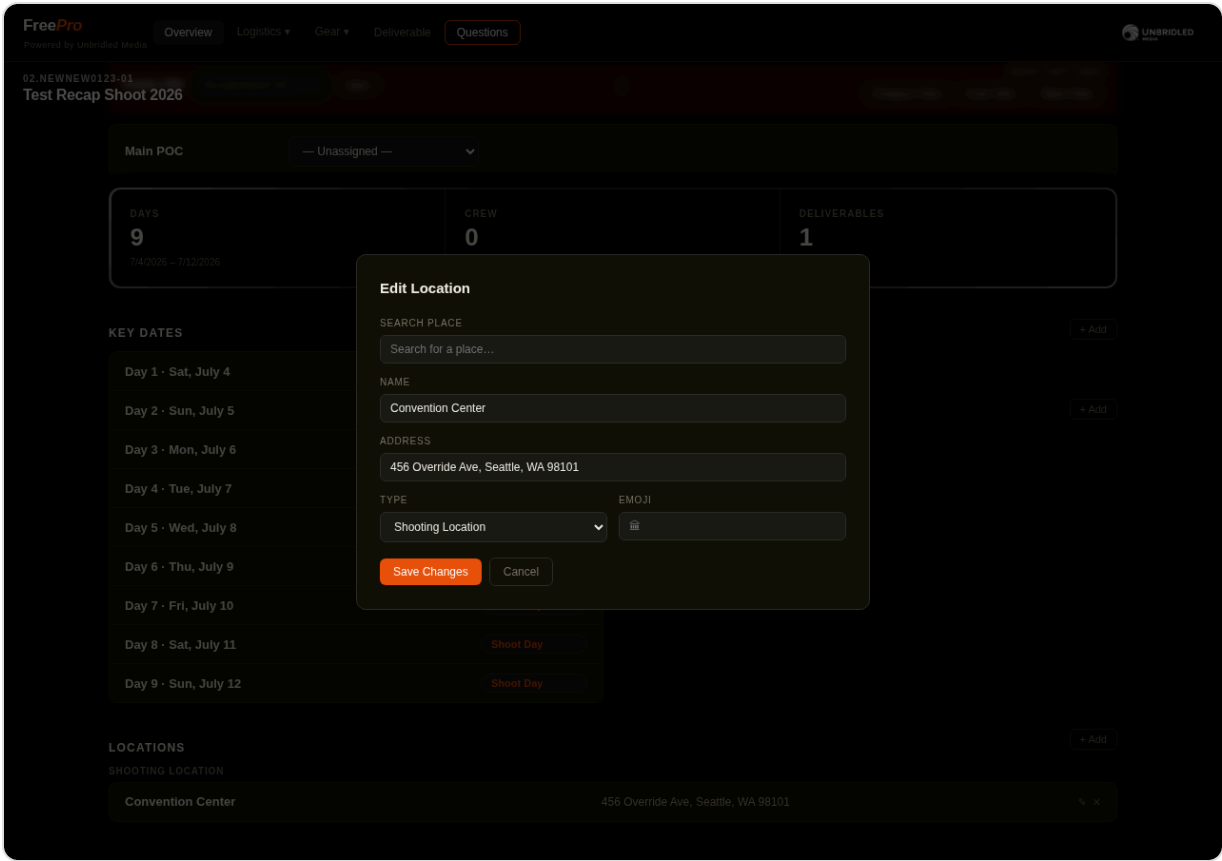

Location addresses on a FreePro project are no longer locked to what the map search fills in. Every location row has an  edit button that reopens the location form with the current details, so a wrong or outdated address can be corrected manually — the maps link and call sheets use your override.

WHERE TO ACCESS IT

FreePro → any project → Overview tab → Locations → the  on a location row.

HOW TO USE IT

- 1. Click  on the location row.
- 2. Fix the **Address** (or Name, Type, Emoji) — type over it manually, or re-run the place search.
- 3. Click **Save Changes** — the row, maps link, and anywhere the location appears now use the corrected address.

Reference photos on the Shot List

WHAT IT IS

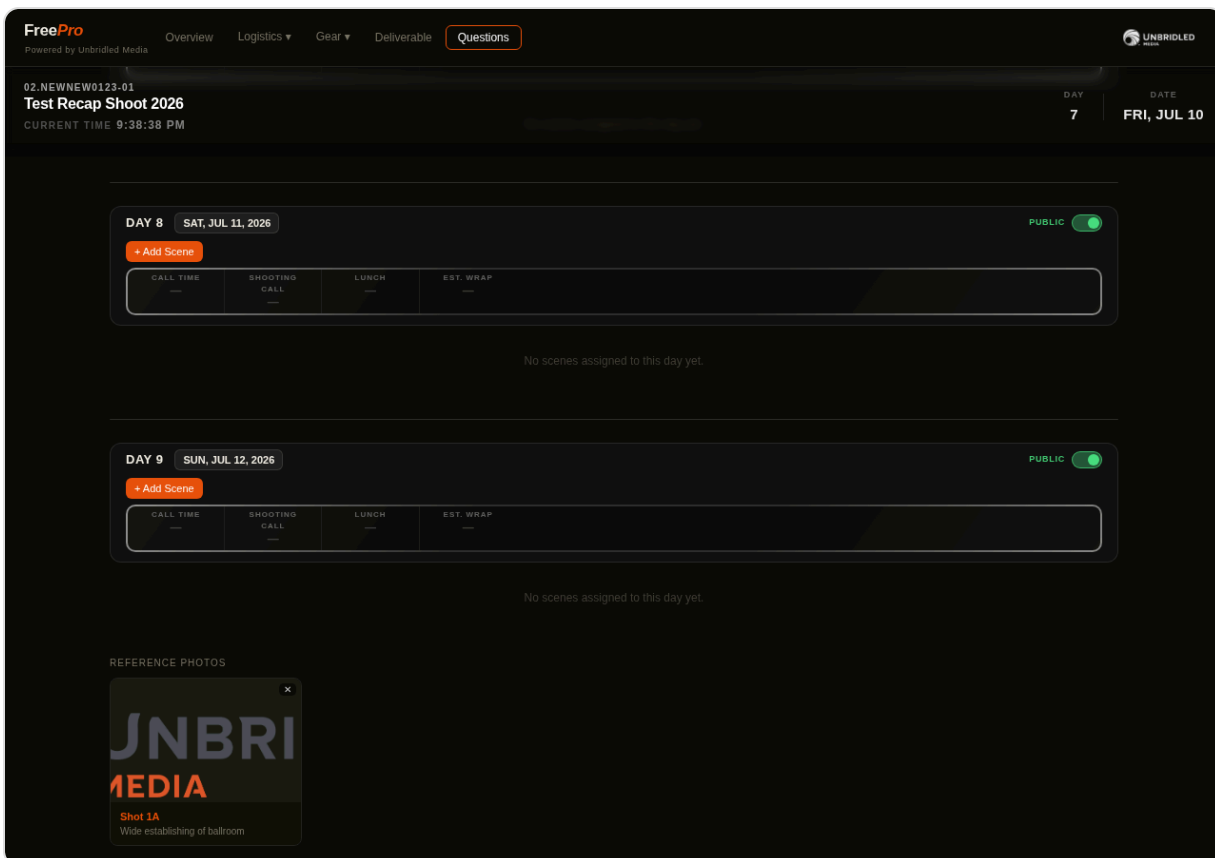

Every shot can now carry reference photos — framing references, location stills, storyboard frames. Upload from the shot's detail form, and a Reference Photos section at the bottom of the Shot List shows every photo in shot order, labeled with the shot number and title.

WHERE TO ACCESS IT

FreePro → project → Logistics → Shot List. Upload from a shot's expanded detail (or its pop-out on mobile); browse the Reference Photos section at the bottom of the page.

HOW TO USE IT

1. Open a shot's detail and click **+ Reference Photo** to upload an image (15MB max).
2. Scroll to the bottom of the Shot List — photos appear as tiles in sequential shot order with "Shot 1A" and the shot's description.
3. Click a tile to view it full size; ✕ deletes it.

FEATURE 24 OF 35

Additional Docs — reference documents on every shoot

WHAT IT IS

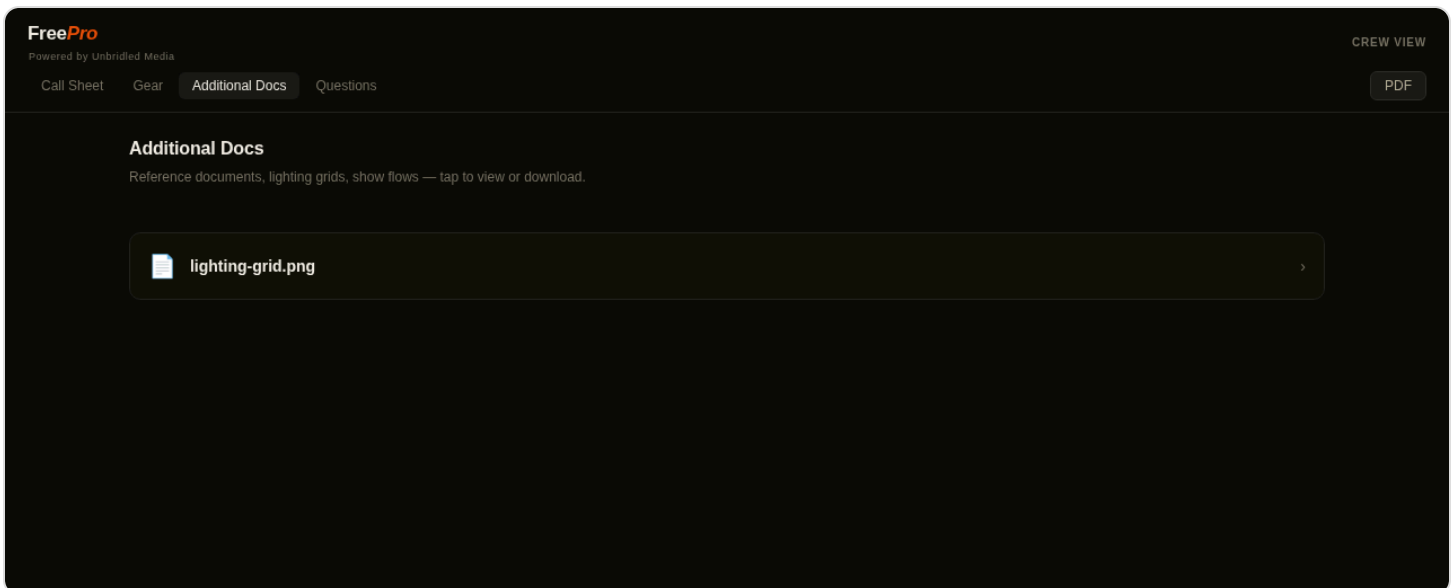

A new Additional Docs tab under FreePro's Logistics dropdown stores reference documents for the shoot — lighting grids, show flows, floor plans, run-of-show decks. When documents exist, the producer and crew call sheet views grow a matching Additional Docs tab with tap-to-view links; with nothing uploaded, the tab stays out of the crew's nav entirely.

WHERE TO ACCESS IT

FreePro → project → Logistics → Additional Docs. Crew/producers see them on their shared call sheet views.

HOW TO USE IT

1. Open **Logistics** → **Additional Docs** and click + **Upload Doc** (any file type, 25MB max).
2. Click a row to view or download; × deletes it.
3. On producer and crew share links, an **Additional Docs** tab appears automatically once at least one document exists.

Testing — Feedback & Features button

WHAT IT IS

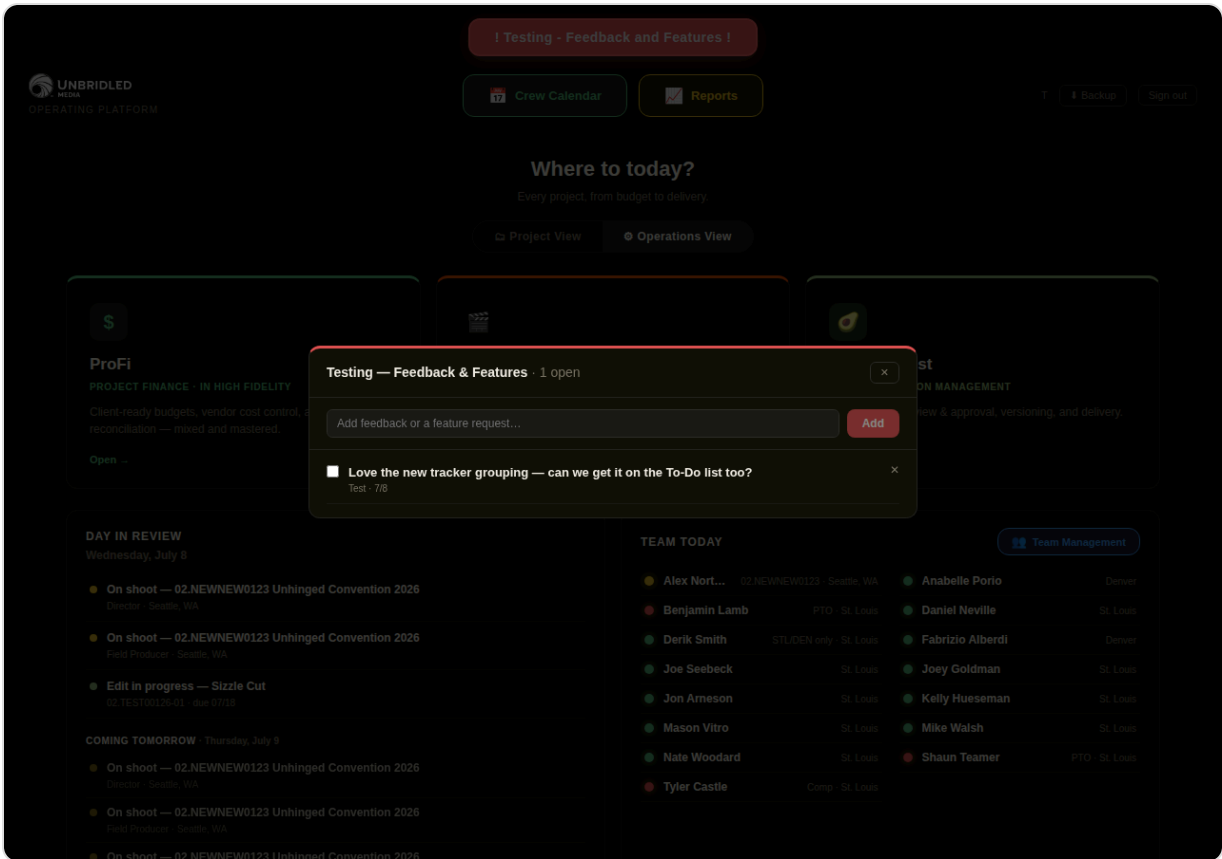

A big red button at the very top of the hub opens the team's one running checklist for testing feedback and feature requests. Anyone signed in — crew included — can add items, check them off when handled, and delete them. Each entry shows who added it and when, and the header counts what's still open. This is the only place the list lives.

WHERE TO ACCESS IT

The hub (home page) — the red button above everything else.

HOW TO USE IT

- 1. Click **! Testing - Feedback and Features !** at the top of the hub.
- 2. Type your feedback or feature request and press **Add** (or Enter).
- 3. Check an item off when it's been handled — it strikes through and drops below the open items.
- 4. **X** deletes an item (with a confirm).

Creative Docs on the Project Overview

WHAT IT IS

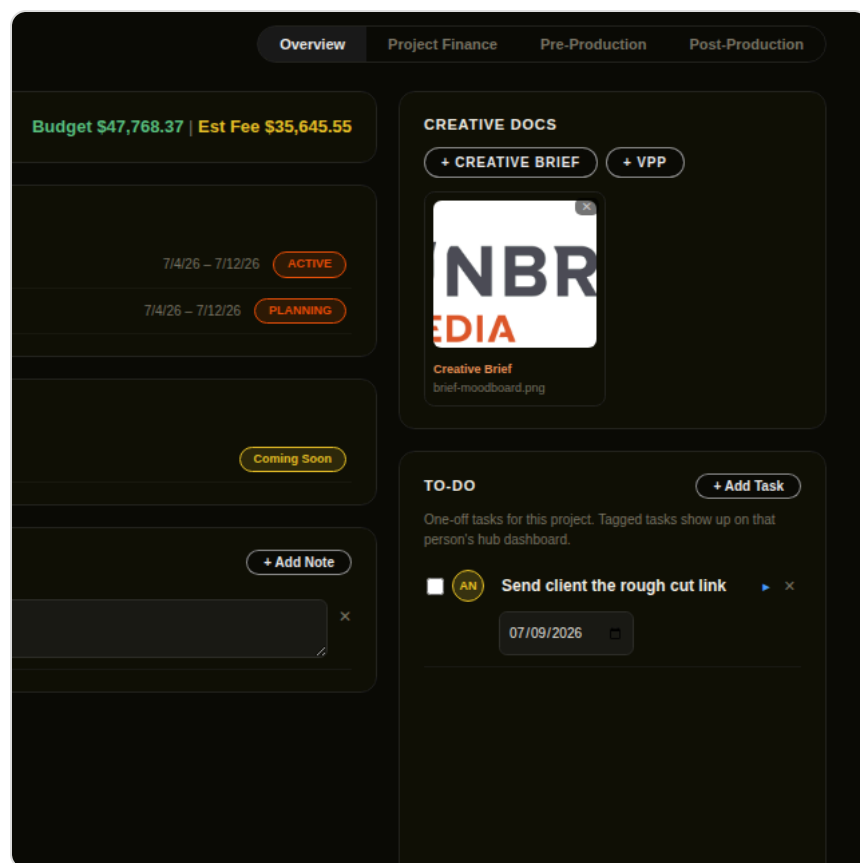

The Overview's right column has a Creative Docs tile for the project's creative brief and VPP. Uploads show live preview thumbnails (images render directly, PDFs show their first page) and open in a pop-out viewer with a download button.

WHERE TO ACCESS IT

Hub → Project View → project → Overview tab → Creative Docs tile (above To-Do).

HOW TO USE IT

1. Click **+ Creative Brief** or **+ VPP** and pick the file (25MB max).
2. Each doc shows as a labeled preview card — click it to open the full pop-out viewer.
3. ⬇ Download saves the original; the small ✕ on a card deletes it.

FEATURE 27 OF 35

Overview budget tile — status, totals, and client identity

WHAT IT IS

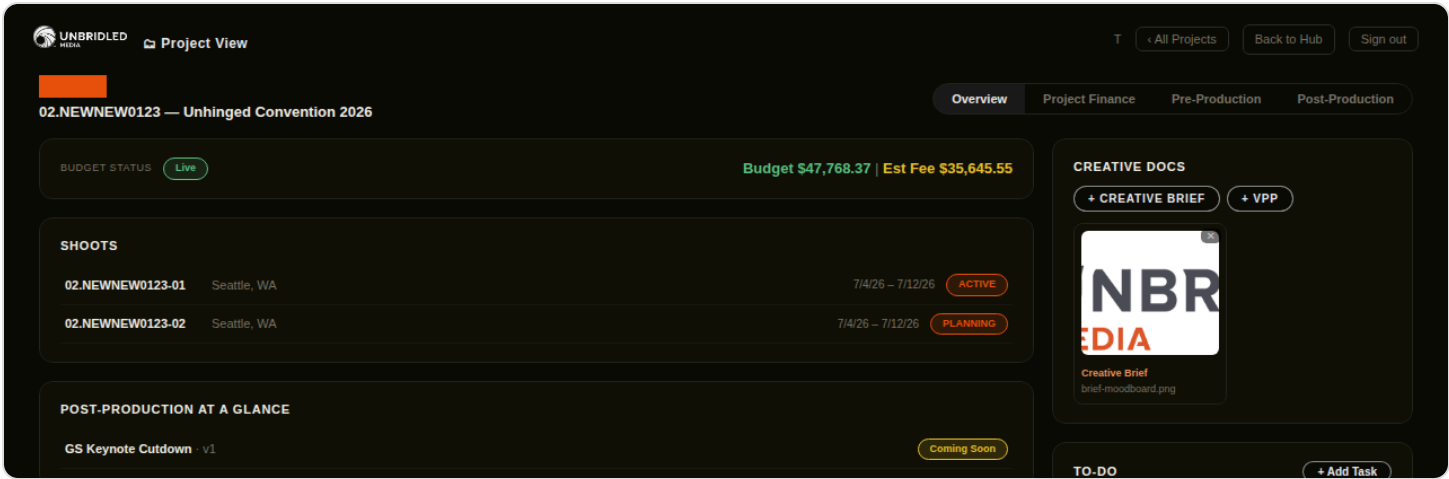

The Overview's budget tile is now a slim strip: Budget Status on the left, the running totals on the right — Budget (the live ProFi budget total) and Est Fee (the billable profit from the VCC: budget total minus vendor costs). The client's logo (or name) now sits above the project code at the top of the page.

WHERE TO ACCESS IT

Hub → Project View → project → Overview tab.

HOW TO USE IT

- 1. **Budget \$x** uses the same math as the ProFi pipeline, live.
- 2. **Est Fee \$y** matches the VCC Profit Summary — it moves as vendor costs land.
- 3. The client logo above the code comes from the budget's stored client logo; projects without one show the client name.

FEATURE 28 OF 35

Task polish — initials chips, notes, and due badges

WHAT IT IS

Project tasks got a round of polish. Assignees show as colored first/last-initial chips beside the task name (click to reassign or unassign). On the hub, My Tasks dates read “Due 7/9”, anything due today shows ! Due Today with an orange (!) Task Due Today badge on the section header, and clicking a task expands its description/notes — click the note to jump to the project's Overview.

WHERE TO ACCESS IT

Project Overview → To-Do column, and the hub's Day in Review → My Tasks.

HOW TO USE IT

- 1. On a task, click the initials chip (or dashed +) to pick a crew member from the roster.
- 2. On the hub, click a task's name to expand its description; click the panel to open the project.
- 3. Due dates show as “Due x/x”; overdue turns red and due-today shows ! Due Today.

Day in Review — today's date, Coming Tomorrow, and in-progress work

WHAT IT IS

The Day in Review panel now shows today's date under its header, mirrors everything from the Crew Calendar that spans today (green “Edit in progress” and “Working: ...” rows alongside shoots, due dates, and PTO), and previews the next day in a Coming Tomorrow section above My Tasks.

WHERE TO ACCESS IT

The hub (home page) → Day in Review panel.

HOW TO USE IT

- 1. Today's items list first — shoots, due milestones, edits in progress, PTO.
- 2. **Coming Tomorrow** (with tomorrow's date) previews the same signals for the next day, slightly dimmed.
- 3. Every row clicks through to its shoot or edit.

Team Today — two columns and STL/DEN Only handling

WHAT IT IS

The Team Today roster now lists in two columns (one on phones), halving the tile's height. STL/DEN Only requests no longer mark someone as out — they stay green in-office with an “STL/DEN only” note, since it's a no-travel scheduling notation, not time off.

WHERE TO ACCESS IT

The hub (home page) → Team Today panel.

HOW TO USE IT

- 1. ● PTO/ooo · ● traveling/on a shoot · ● in office.
- 2. Someone on an STL/DEN Only request shows green with “STL/DEN only” beside their office — bookable locally, not for travel.

User Management

Travel/Local flag on the crew roster

WHAT IT IS

Every crew member can be flagged Travel (default) or Local. The toggle lives on the crew edit form, and the assigned-crew grid on each project shows a TRAVEL (blue) or LOCAL (gray) pill per person — one flag on the roster record, consistent across every project.

WHERE TO ACCESS IT

FreePro → project → Crew tab (form + grid), and the Roster Lookup in Team Management.

HOW TO USE IT

- 1. Open a crew member's edit form and flip the **Travel / Local** toggle next to Home Airport.
- 2. The **Travel** column on the crew grid (between Dietary and Start Date) shows each person's flag.

Video Tracker — Types, grouping, and Add Deliverable

WHAT IT IS

The Project Video Tracker's Type column is now a dropdown — Pre-Event, On-Site, Post-Event, or Standard Edit — and the tracker groups its rows into colored sections in that order (untyped videos collect under No Type Yet). The Style column is gone, and + Add Row is now + Add Deliverable, opening the full post-production form.

WHERE TO ACCESS IT

AvocadoPost → Project Lookup → project → Project Video Tracker tab.

HOW TO USE IT

- 1. Pick a **Type** on any row — it moves to that section instantly.
- 2. **+ Add Deliverable** opens the full edit form (title, type, editor, specs, dates, review link, status).
- 3. Drag **⋮** to reorder within a section; filters, custom columns, and merges work as before.

Merge Cells

Feeds live from the editing pipeline. Title, due date, editor, review link, and status come from each edit. Type, Notes, Video Assets, and any custom columns are editable here.

FEATURE 33 OF 35

Deliverables and Post-Production are one form

WHAT IT IS

The FreePro Deliverables page and the AvocadoPost pipeline now share a single form and stay identical. + Add Deliverable creates a real pipeline edit; editing a deliverable patches the linked edit. The form carries the full post-production field set — including a Status dropdown that defaults to Coming Soon — and the deliverables list groups by Type (Pre-Event / On-Site / Post-Event / Standard Edit) instead of the old categories.

WHERE TO ACCESS IT

FreePro → project → Deliverable tab; the same form opens from the Avo tracker's + Add Deliverable.

HOW TO USE IT

1. **+ Add Deliverable** opens the shared form — set Status (defaults to Coming Soon), Type, editor, PM, specs, dates, and review link.
2. Saving creates the matching AvocadoPost edit automatically; edits made on either side sync to the other.
3. The list groups by Type, with legacy categories mapped onto the new types.

The screenshot shows the FreePro interface with a modal form titled "Add Deliverable". The form is a dark-themed overlay with the following fields:

- VIDEO TITLE: Text input field.
- DESCRIPTION: Text input field with placeholder "Plays Day 4 GS - 2 min".
- STATUS: Dropdown menu with "Coming Soon" selected.
- TYPE: Dropdown menu with "—" selected.
- CATEGORY: Dropdown menu with "—" selected.
- LEAD EDITOR: Dropdown menu with "— Unassigned —" selected.
- PROJECT MANAGER: Dropdown menu with "— No PM —" selected.
- ASPECT RATIO: Text input field with "16.9".
- RESOLUTION: Text input field with "1920x1080".
- ASSET REF: Text input field with "Asset #801_".
- MUSIC REF: Text input field with "C3 Recap Music".
- START DATE: Text input field with "mm/dd/yyyy" and a calendar icon.
- DUE DATE: Text input field with "mm/dd/yyyy" and a calendar icon.
- REVIEW LINK: Text input field with "https://frame.io/...".

At the bottom of the form are "Save" and "Cancel" buttons. Below the form, a small note states: "These fields mirror the AvocadoPost edit — changes here update the pipeline and vice versa."

The background interface shows a sidebar with "Post-Production" and "Deliverables" sections. The "Deliverables" section lists "1 output" and "GS Keynote Cutdown". The top navigation bar includes "Overview", "Logistics", "Gear", "Deliverable", and "Questions".

FEATURE 34 OF 35

Timeline tools — Skip milestones and Copy Timeline From

WHAT IT IS

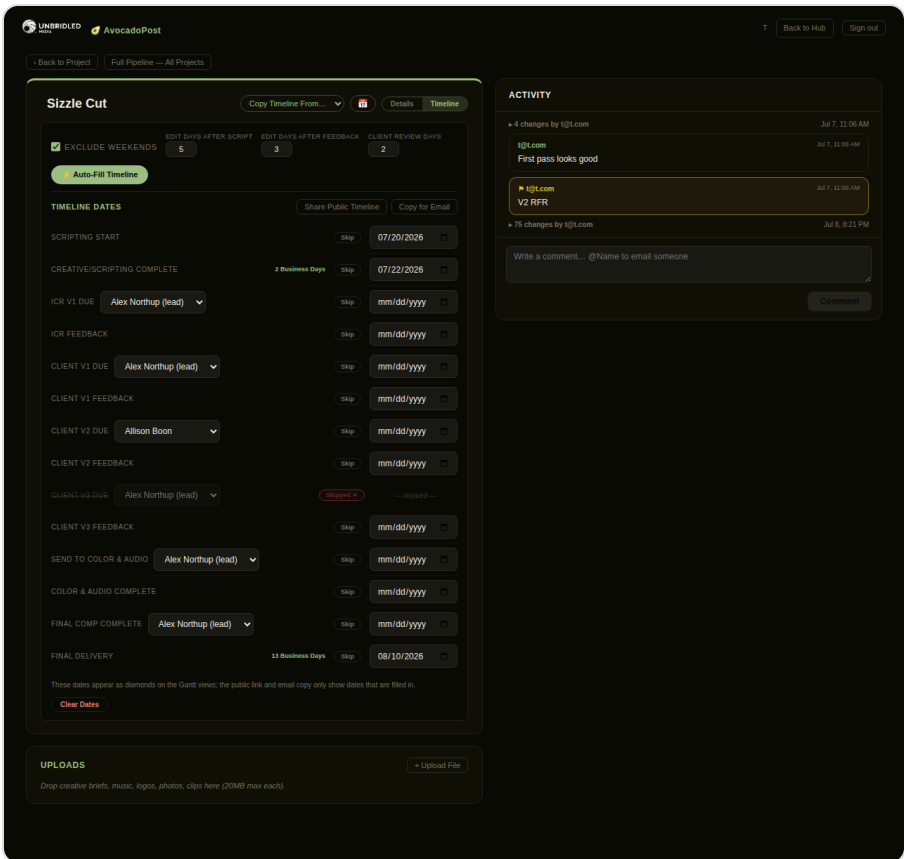

Two additions to an edit's Timeline Dates. A Skip button beside every milestone drops it from the flow — the row strikes through, the business-day gaps chain across it, auto-fill lays dates past it, and it disappears from the Gantt, calendar, and email copies (Skipped × restores it). And a Copy Timeline From... dropdown (next to the  calendar button) copies the full timeline — dates and skips — from any other edit on the same project.

WHERE TO ACCESS IT

AvocadoPost → any edit → Timeline view.

HOW TO USE IT

- 1. Click **Skip** to the left of a date to remove that milestone from the flow; click **Skipped ×** to bring it back.
- 2. Use **Copy Timeline From...** at the top to pull another edit's dates — it fully replaces this edit's timeline after a confirm.
- 3. ⚡ Auto-Fill respects skips, laying dates straight through the remaining milestones.

FEATURE 35 OF 35

Schedule events for specific crew

WHAT IT IS

The Add Event pop-out on the schedule now lets you target events at individual crew members. Selecting the Video tag reveals a chip for every person on the project (name · position) — pick who the event applies to, or leave them all unselected and it applies to everyone. The separate Audio tag is gone; individual selection covers it. Targeted events only show on those people's call sheets and role-specific views.

WHERE TO ACCESS IT

FreePro → project → Logistics → Schedule → + Add Event (or editing an event).

HOW TO USE IT

1. In Add Event, tap the **Video** tag — crew chips appear below.
2. Tap the people the event applies to; leave all unselected for everyone.
3. **All Crew** still toggles the whole team in one tap.
4. On shared call sheets, events tagged to specific people hide for everyone else.
